

I am writing to you to encourage you to not allow the FCC to implement any proposal that would lessen the Indiana's Telephone Privacy law protections. We as a family value our time at home together and it is very disruptive to be constantly fielding the streams of calls from people wanting to sell us something. Where does it all end? Can't we have some peace and quiet in our own home?

Stress seems to be playing a major role in everyone's lives and if you revoke or lessen this wonderful law, it will be one more slap in the face of Indiana citizens. Please, if marketers want to market their products, then they should GO to the market and we will come to them. Thank you.
